

PRIYADHARSHAN T.

DATA ANALYST | SQL · PYTHON · POWER BI · EXCEL · TABLEAU

6374193035 | priyan32pp@gmail.com | LinkedIn | GitHub Portfolio | Bangalore / Chennai (Open to Remote)

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with hands-on internship and project experience in data cleaning, exploratory analysis, SQL querying, Python/Pandas, Excel, and Power BI dashboard development. Skilled in KPI reporting, business-focused visualization, and translating datasets into clear insights. Built portfolio projects across sales, customer churn, customer behavior, entertainment, music, and AI-focused sales intelligence.

TECHNICAL SKILLS

SQL: Querying, filtering, aggregation, joins

Python: Python, Pandas

BI & Visualization: Power BI, Tableau, Excel, dashboard design, KPI cards, filters

Data Analysis: Data cleaning & validation, EDA, statistical analysis, summary statistics

Reporting: Dashboard development, stakeholder reporting, cross-functional collaboration

Developing: BigQuery, Snowflake, PostgreSQL, API integration, Apache Spark, Python data pipelines

PROJECTS

Customer Churn Analysis | Python, Pandas, SQL, Excel, Power BI

- Wrote SQL queries and used Pandas to analyze churn patterns across contract types, tenure, and monthly charges; built a Power BI dashboard with KPI cards and contract-based visualizations to flag high-risk customer segments.

Sales Performance Analysis | Python, SQL, Excel, Power BI

- Aggregated and compared sales metrics across regions and time periods using SQL; created Power BI visual reports to communicate sales insights and trends.

Customer Analysis | Python, Pandas, Excel

- Analyzed customer demographics and purchasing behavior using filtering, sorting, grouping, and summary statistics to identify high-value customers and repeat-purchase patterns.

Sales Data Analysis | Python, Pandas, SQL, Excel

- Cleaned and analyzed sales data using Python, Pandas, and SQL; calculated summary metrics and organized results in Excel for data-driven reporting.

Power BI Data Analysis Dashboard | Power BI, Excel

- Created an interactive dashboard with cards, charts, and filters to summarize business data, reduce manual reporting, and support faster decision-making.

Netflix Data Analysis & Visualization | Python, Pandas, Matplotlib

- Cleaned and preprocessed the Netflix titles dataset; performed EDA on content distribution by type, country, and rating, and built Matplotlib visualizations to surface content trends over time.

Spotify Data Analysis | Python, Pandas, Power BI, Data Visualization

- Cleaned and analyzed Spotify streaming data using Python and Pandas to explore track popularity, genres, and audio features; built a Power BI dashboard to visualize listening patterns and key metrics.

AI Sales Intelligence | Power BI, Excel, Data Visualization

- Built an interactive AI Sales Intelligence dashboard to analyze sales KPIs, age-based sales performance, and monthly sales trends, using Power BI visuals and filters to present business insights.

INTERNSHIP EXPERIENCE

Data Analytics Engineer Intern | Unscript Labs | Jun – Jul 2026 (30 days)

- Applied Python, SQL, Excel, and Power BI to real-world datasets, supporting data cleaning, analysis, and dashboard reporting tasks.

Gen AI Intern & AI Literacy Intern | IBM SkillsBuild

- Completed applied training in generative AI concepts and foundational AI literacy as part of IBM SkillsBuild internship programs.

EDUCATION

B.E. Computer Science and Engineering | M.A.M College of Engineering and Technology | Expected 2027

CERTIFICATIONS & TRAINING

- AI Fundamentals: Foundations for Understanding AI — IBM SkillsBuild
- Generative AI Fundamentals — IBM SkillsBuild
- Introduction to Generative AI — Simplilearn SkillUp (Powered by Google Cloud), 16 Sep 2026
